## **DVC announces ClipRecorder Portable**

**December 2010**

With the new ClipRecorder Portable DVC complements their portfolio of uncompressed SD & HD disk recorders with a portable and very robust solution, especially designed for on-set requirements.

As well as DVC's compact Boxxster the portable ClipRecorder version supports resolutions up to 1080p60 or 2k with 10bit.

To deliver the content to the post production as fast as possible, the disks are hot-swappable and can be directly integrated into the post production workflow via an optional docking station. The docking station provides multiple interfaces as IEEE, USB, eSATA, GigE and Fibre for an easy and uncomplicated transfer.
