

**Press Release**

**DVC ANNOUNCES RESELLER AGREEMENT WITH THE SPANISH  
COMPANY ISID**

**July 2010**

DVC Digital Video Competence, the most reputed German system-integrator and distributor for professional broadcast and streaming solutions, extends his portfolio with the Video Monitoring and Media Asset Management software products from ISID. DVC will be the official masterdistributor in Germany, Austria and Switzerland.

ISID is a Spanish provider of Media Asset Management, logging and broadcast monitoring solutions. Since 1996 ISID is developing efficient applications to manage video, audio and images, customized to different markets. The main product called Videoma is based on a MAM (Media Asset Manager), robust, modular and scalable. The big experience in content management makes ISID a perfect partner in digital information management at its different stages: ingesting, cataloguing, searching and publishing. Several options can be taken for publishing, from OEM Content Management Systems Integration to Web Sites or to Streaming and WebTV applications.

ISID offers software solutions for video monitoring and logging. Videoma Broadcast Monitor captures, stores and indexes broadcast content from multiple channels offering 24/7 monitoring for broadcasters or government. There's a large portfolio from compliance recording to large deployments with automatic indexation tools, from advertisements to security forensics.

Some of ISID's customers are the Basque Film Archive, Complutense University, Prime Minister's office, Madrid Council Town, As Newspaper, esmadrid.com, Albeniz Foundation or the Emergency Military Force.
