

At this year's IBC DVC Digital Video Competence will be presenting at booth 6.A14 together with its long-time partner Drastic Technologies the following products:

- Boxxster - compact, uncompressed and file-based SD, HD & 2k Disk Recorder based on Drastic DDR software. The new Boxxster versions support resolutions up to 1080p60 or 2k at 10bit and therewith is the ideal solution for locations where low-noise and compact design is required - without making any compromise in video quality.
- A full set of IPTV streaming solutions from Exterity and Haivision i.e. encoders, gateways and IP settop boxes. The wide-ranged portfolio also contains servers for recording, scheduled playout and VOD. With these high quality streaming solutions DVC can supply any required device for small up to large scale IPTV installations including full service. So DVC is the ideal partner for all requirements of the fast growing market of supplying Video over IP.
- With Net-X-Code Drastic developed a tool for capturing multiple network audio and video streams including real time translation to various standard file formats. Net-X-Code will be shown at IBC in combination with the above mentioned products.
- Drastic's Wrangler Mini with DTouch software provides a compact I/O device for a wide range of applications. The intuitive touch screen interface offers a robust set of capture, playback and setup tools with familiar touch, swipe and drag operation.
